

Description:

1. Get 51 Arduino STM32 microcontroller routine
2. with a USB interface, you can watch the computer positioning effect directly phone line.
3. with the passive ceramic antenna and passive antenna amplifier, make better use of the individual effects.
4. with SMA interface can be directly connected to an active antenna SMA
5. Size: 39*25.5mm

Package Included:

1 x NEO-7M GPS Satellite Positioning Module for Arduino STM32 C51
